

## **YETI PROMO**

During setup, after the Hunting Grounds is created, shuffle the Yeti into the bottom half of the Animal deck. It can be gained as an Animal card.

The Yeti does not have a Tip ability, nor is it worth any points at the end of the game. Instead, during your turn in the Eclipse phase, after resolving your Tribe cards, but before gaining any benefits from the Terrain board, score 1 point for each Sacred Stone tile you have on your Player board.
